

## Progress Report

**Name:** Adeyimika Agboola Adetunji  
**Course:** Simulink Onramp  
**Progress:** **81%** complete (as of 6 June 2025)

### Chapters

- |   |             |                                     |            |
|---|-------------|-------------------------------------|------------|
| 1. Course Overview                        | <b>100%</b> | 12. Project - Modeling a Thermostat | <b>66%</b> |
| 2. Simulink Graphical Environment         | <b>75%</b>  | 13. Project - Peregrine Falcon Dive | <b>33%</b> |
| 3. Inspecting Signals                     | <b>100%</b> | 14. Conclusion                      | <b>0%</b>  |
| 4. Basic Algorithms                       | <b>100%</b> |                                     |            |
| 5. Obtaining Help                         | <b>100%</b> |                                     |            |
| 6. Project - Automotive Performance Modes | <b>100%</b> |                                     |            |
| 7. Simulink and MATLAB                    | <b>100%</b> |                                     |            |
| 8. Dynamic Systems in Simulink            | <b>100%</b> |                                     |            |
| 9. Discrete Systems                       | <b>100%</b> |                                     |            |
| 10. Continuous Systems                    | <b>66%</b>  |                                     |            |
| 11. Simulation Time                       | <b>100%</b> |                                     |            |
